# ABOUT US

ONECBM LOGISTICS PRIVATE LIMITED is a leading global freight forwarding and logistics company offering air freight, ocean freight, project cargo management, and customs clearance solutions. Headquartered in Mumbai with a strong operational presence across India, we specialize in delivering timely, secure, and cost-efficient transportation of goods worldwide.

With deep industry expertise and a commitment to operational excellence, ONECBM provides end-to-end logistics services, including packaging, labeling, quality checks, documentation, and cargo consolidation. Our ability to manage complex, oversized, and high-value project cargo sets us apart in the industry.

Driven by reliability, transparency, and customer satisfaction, we ensure seamless coordination across the supply chain – from origin to destination. At ONECBM, our mission is to empower businesses with efficient, compliant, and globally connected logistics solutions that deliver results.

# OUR VISION & MISSION

To become a globally trusted logistics partner, recognized for delivering seamless, efficient, and technology-driven freight solutions that empower businesses and connect markets worldwide.

To deliver reliable, efficient, and cost-effective end-to-end logistics solutions powered by expertise and technology.

# MARKET PROBLEM

## Delays

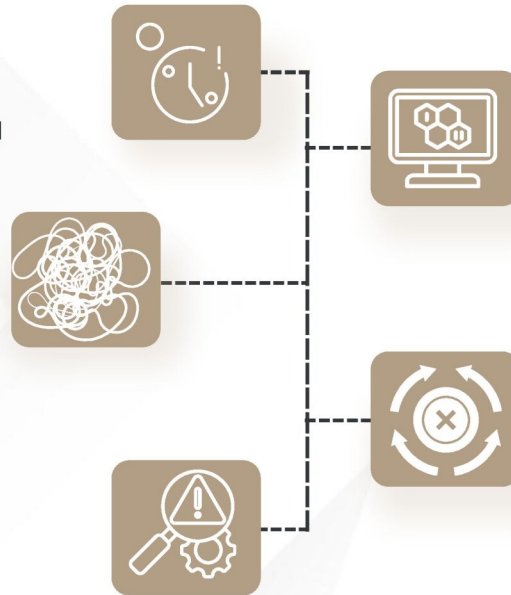

International shipments frequently suffer from significant delays due to inefficient coordination, limited tracking visibility, and unpredictable transit processes.

## Complexity

Customs clearance remains a highly complex and compliance-heavy challenge, causing documentation errors, procedural bottlenecks, and operational slowdowns.

## Limitations

Most logistics providers have major limitations in handling specialized, oversized, or heavy project cargo that demands advanced planning, equipment, and expertise.

## Fragmentation

The logistics ecosystem is extremely fragmented, forcing businesses to work with multiple vendors instead of a unified, end-to-end logistics partner.

## Inconsistency

Service quality and operational reliability vary widely across regions, resulting in inconsistent delivery performance and increased business risk.

# OUR SOLUTION

## Speed

We offer fast and reliable air and ocean freight services that significantly reduce transit delays and ensure timely delivery.

## Expertise

Our in-house customs specialists manage all documentation and compliance, enabling smooth and hassle-free clearance.

## Capability

We provide advanced project cargo handling with the right equipment, planning, and technical know-how to move oversized and complex shipments.

## Integration

ONECBM delivers truly end-to-end logistics by combining freight forwarding, customs clearance, and value-added services under one platform.

## Consistency

With a strong nationwide network and standardized operating procedures, we ensure consistent, dependable service across all regions.

# OUR SERVICES

## Air Freight

Fast, secure, and high-priority air cargo solutions designed for time-critical global deliveries with maximum efficiency and reliability.

## Project Cargo & Customs Services

Specialized handling of oversized, heavy, and complex shipments, with seamless customs clearance, packaging, labeling, and consolidation.

## Ocean Freight

Cost-efficient and scalable FCL/LCL ocean freight services ideal for bulk, heavy, and long-distance shipments across international trade routes.

## International Courier Service

Efficient and reliable international courier solutions for urgent, time-sensitive deliveries worldwide.

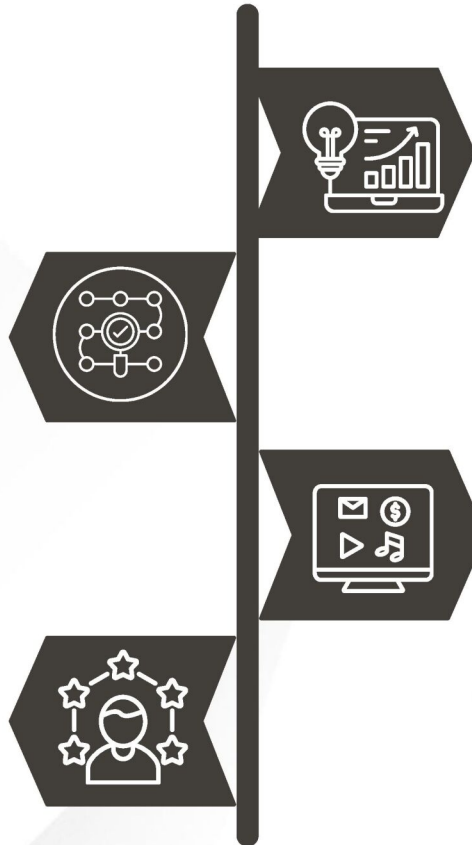

# UNIQUE BUSINESS MODEL

## Integrated End-to-End Platform

ONECBM delivers a complete logistics ecosystem—air freight, ocean freight, project cargo, and customs services—through a single, seamless platform, eliminating multi-vendor dependency.

## Specialized Project Cargo Expertise

We operate with a niche focus on oversized, heavy, and complex project cargo, giving us a competitive edge in high-value industrial and infrastructure sectors.

## Asset-Light & Technology-Driven

Our scalable, asset-light model leverages strong carrier partnerships and digital tools for real-time tracking, documentation automation, and high operational efficiency.

## Multi-Revenue Value-Added Framework

In addition to freight services, we generate diversified revenue through packaging, labeling, inspection, and consolidation enhancing client retention and profitability.

# AIM TO SCALE UP

## Expand Geographic Reach

Strengthen presence across major Indian logistics hubs and enter high-potential international trade lanes to boost global freight capabilities.

## Upgrade Technology & Automation

Implement advanced digital tools for real-time tracking, documentation automation, and operational transparency to enhance customer experience and efficiency.

## Diversify Service Portfolio

Introduce warehousing, last-mile delivery, and supply chain management solutions to evolve from a freight forwarder into a full-stack logistics provider.

## Build Strategic Partnerships

Collaborate with global carriers, agents, and industry partners to increase capacity, improve service speed, and expand global connectivity.
